## QUALITY

Quality is our guiding principle.

Quality and accurate end production, timely implementation of contractual obligations, top-notch expert advice in the field of Services and selection of environmentally friendly materials, as well as maximum adaptation to customer wishes, are all values pursued at our company. Our purchasers, who gave us a very high grade, also prove that we are on the right track.

## QUALITY CERTIFICATES

The ISO 9001 Quality Standard was already introduced at the company VAR in 2001. We also acquired the ISO/TS 16949: 2000 (IATF 16949) Automotive Industry Quality Standard at the beginning of 2008. Those Standards confirm our commitment to achieving the highest quality with a great emphasis also placed on environmental aspects.

## THE NEW VAR FACTORY

In the "Mele" industrial zone, just three kilometers from the current production location, the company VAR is building a new factory, in which 1.6 million euros have been invested so far.

The land has a total size of 30.000 m2. A building permit and project documentation were already obtained - construction of the building - 7.500 m2. All infrastructure (water, gas, electricity) on the land is already arranged, so immediate construction is possible.

## OUR KEY CUSTOMERS

VAR's sales are divided between large multinational automotive manufacturers and first-tier or second-tier component manufacturers.
